9. why work + leisure ideologies not work + corruption, which seems the 'contrast year' of situation

11. If these readings, always already ideological influence (+ constrain) the freedom of reinscription, does not modify the theoretical paradigms of discourse construction significantly?

100
122
216

18. questions - human labour - not only a subjective key, human nature but about the material transformation, culture our nature. It's not about 'people'. Contradictory. But it's quite a demand

32. Perhaps the discourse construction of subject ought to open a new chapter, not conclude the solidified review. But of a jump.

- power
- corruption

Old headings (typography) P 76, P 55, P 106

74-5. The reading of 'telepresence' as a materiality of ^{material} 'symbolic' to 'excellence' as a materiality of organized symbolization it clearly ought spelled out. Can we as scholars come to the Outage? What is the connection? (Miller, Rose's 'connections + symmetries')

P 89 your bridging different things into one: functioning relations/organic ideology; reflexivity - (Cadden) / - idea - project of ourselves

P 91 you can throw away the ideological spectacles & 'wake up to reality'; but what of the gap between 'progressive aspirations of progress' & the actual usage of Rose's language in everyday life by employees? (P 90)?

P59 very up paper. Is Hacking's totally from above/
actual behaviour really it a replication of the
constant behaviour - mostly/natural,
Stimulus/gang, discourse/real. ? P211 - the actual
behaviour?

P100 what the subjects make of their subjectification. Have
you changed this? Is it the Poncet's resistance - not discussed
(part of the same system of power).? Or introduction's clear?

tactics? (deleuze)

deleuze (= limit to the length of subjectification -
- Poncet) is introduced with the other research work.

P122 the dynamics of subjectification are not complicated &
consistent than identity with the dynamics presented by the
biologicals of regulation?

But what are the technologies of resistance?

control power.
control discourse
Philly/industrial?
power/local?

133 Gardner, Ruppert, et al in Bidney.
89

~~Resistance to resistance~~

P211 'biocycle' - know about US. - This situation was arguably
more limited & constrained (Poncet's long history) than
when linked to the de-biologized post-structural 'pleasure' &
play.

216 de Certeau - a single, quite psychanalytic word for
the dynamics of subjectification are not complicated by the same.
- what are the sources of this local, resistant kernel?

sub of decrease (Paul) ↓
phys - subjective (Laca) ↑

4.1.
B280 Locher cannot evade the encounter with the
Faulstich idea of rationalization.

4.2.
will power always win, high & cannot survive?

Analysis rather than dominant conception of power?

responding to high the practical instrument?

4.4.
refers the question of Analysis rationally?

So?

analysis & quality to the new Theory?

related to the properties of power/control. (Brennan?)

I.00.

very complex.

He then made use of a new, cogent paradigm
of mind in the area. It gave a clear, concise and,
for the most part, coherent statement of his approach.
It effectively pieced together the work of a number of
different theorists. It made a mark on the whole
current application of this paradigm to the empirical
and theory world.

4.1. very poor.

4.2. passing the Newbold Rules together.
application of procedure to the case.

4.4. 3 articles
better.

J. 00. very repetitive.

He Davis made use of a new, engaging procedure
if used in this case. It gave a clear, concise and,
for the rest part, elegant statement of his approach.
It effectively pieced together the work of a number of
different theorists. It made a novel use, on the whole,
current application of his procedure to the empirical
case they studied.

Can we speak of 'the war'?

Let the verb know of - doing 'provision'
how it evolved to be.
