Search for the essence

Yet there must be both substantive questions
and procedures specific & distinctive
enough to define Narrative
as a specific genre.

Some of the multitypical procedures or aspects which I
cannot do here.

(1) Didactical

Not define the didactical action
nor the complex relations with Hegel's work.

Narrative is didactical — determining

— the very substance of the
process — the way in which it
appears, in a fixed,

— stability — the ability of
social relations as
to object.

— process / contradiction
resolves through contradiction

①

how to think the complex unity of a
 whole of production, as a unity composed
 of events, different, articulated into a
unity. This means that, as well as
 each possessing the conditions for others
 existence each has conditions of existence of
 its own, specifically, not from of conditions
specific to it: hence unity of differences.
 That is, each also has limits, those superior
 is a barrier to the self-expanding capacity of
 'the whole'. How the whole then is the complex
result of many determinations. This is i.e. a real
process through time (time of realization).
