- ① UN - shifting/tilting balance of power.

HAVANA

SUNDAY

First impressions of Havana by
day / long, bustling jumble of a
city, immensely vibrant - combination
of American skyscraper architecture &
spanish style block buildings. Few
churches & not obviously part of the
architecture. Open spaces between
high buildings. Cars, cars, cars, all
large & fast, American style,
then lounging against the sea-wall,
melancholic, looking out as sea
splashed over wall. Kids & men in
the street, shirt sleeves & hats, cigars.
Boys often with shirts & shirts
hanging out, often without shirts,
swimming, hanging out of windows, in
the open bars & cafes, walking
along the pavement or standing in
the arcades.

~~LAST~~ ~~AV.~~

Immense facial, racial types + crosses, united by a common identifiable Spanish style + speech. Everywhere, pieces of military uniforms - different shades of green, or caps, or boots. On + off duty - many of them boys in late teens, but also others... + women.

Housing estate - fabulous - huge blocks of flats with balconies. Case of contrasting colour schemes - a city by the sea. In any other setting - confused. Colour used for variety - not functional. But spaced + landscaped. Colour often chosen by one working on buildings. Kids - thousands. Invited into homes by girls. Young girl - 15 - married in Gengre - living in flats. Many people who have returned from.

~~THEATRE~~

curved roofs - Super supermarket

~~Problems~~

Problems of juvenile delinquency:

- crime rate extremely low.
- Stolen cars difficult because
political delinquency may
be an expression of
pol. delinquency.

Absenteeism

- very grave
- want to avoid compulsory
measure, but may
be necessary
- problem is great disparity of
wages.
- $\therefore$ some workers can live
very well on much less work

~~QUESTIONS~~

What priorities decide whether
factories will be produced or imported

- ① Order of pri. for investment
- ② Degree of technical complexity
- ③ Strategic importance
- ④ Market considerations -
whether it covers its costs easily
- ⑤ availability of + cost of raw materials.

- Its intended to make Cuba
self sufficient in food.

wine, maize.

- otherwise no

-

Attitude of India To Multinational Multinationals

- we don't call ourselves neutral or non-aligned
- consider India an extremely import country & her role in world affairs is import
- economies of 2 countries are unfortunately not complementary

Why is The Book Obsolete?

- Hamilton Thesis of 20th C
now obsolete because of
development of the Plan
- Fidel's developed view in
Dec 12th Speech 1961
esp. relation to the Pop. Soc. Party.
In the book, the relation between
F + C played down - largely
because it was the intention to
make Cuba appear less
Communist.

Wish to develop industries
especially for export to capitalist
countries - no long term
planning & ∴ no long term
guarantees. ∴ prefer
to develop other things for the
market - eg. by products of
sugar - which have relatively high
value on world market

- concentrate
- Specifically tropical products
eg. esp, sugar denaturators.
could be taxed also more
valuable by product
eg. molasses.
-

Good enough relation with other
many prod. countries to form a
certain part export buying power
or labor trade unions of
capitalist world?

- Naturally, provided there
are social restrictions there
as well
-

Exchange between universities?

Uses

Spirit of clan rule prevails after
3 yrs. Helped by conf. about
liberacy. Can it last? Is it
a matter of policy or allowed
to take its course?

- Pop spirit a characteristic
of
- The Govt knows his state
occurs at certain stages of
any new after tendency
of it to decline.
- major achievement of C. Govt
to maintain & increase it
at same time as political
consciousness of m. has
been common.
- Govt profoundly aware of
necessity to continue this
not only as a real duty
but as something which gives

the feeling that people
~~can~~ are working for sanctity
of their own. Not organized
by the state, but something
which comes as an instinctive
expression of making the
thing itself.
